

#SheCaresCovid19 Women's Testimonies Around the Globe

Women leaders and community influencers in Nigeria are having sensitisation sessions with the WHO to pass on information about preventing and controlling the Covid-19 to the rest of the community.

Women leadership has never been more vital. Without it, any decision making in relation to the measures of the Covid-19 pandemic will not adequately address women's needs and the hurdles they face on daily basis.

Students all over the world face unprecedented challenges dealing with the psychological impact of isolation, being far away from their families, the pressure of figuring out online courses, and many more. Let's encourage girls to talk to each other to relieve the increased stress!

The female heads of government of Germany, New Zealand, Taiwan, Finland and Denmark are leading by example by providing rapid and effective responses in containing the global pandemic in their home countries.
